Quarterly Newsletter

Meet the new Junior Council Person

Hi! I'm Naz Atabas and I am so grateful and proud to be the newest member of the Hulmeville Borough Council as a Junior Council person. I attend Neshaminy High School and am currently in my junior year. I am also a member of clubs, such as, the Interact Club where we organize projects that help our community. We organize fundraisers and donations to local food banks. I love being involved and helping our community as much as I can. This role will also be a great way for me to learn more about our community.

One way my family and I allow our community to thrive is by nourishing the ecosystem by growing native plants. The benefits of subsistence agriculture are endless, including personal and environmental. It provides a form of education, builds independence skills, and even improves physical and mental health. Subsistence agriculture allows the fertility of soil to constantly rejuvenate and renew itself, it's easy to harvest, and has great nutritional benefits too.

During my sophomore year when I transferred to Abington Friends School for 2 semesters, I had the opportunity to learn more about indigenous plants and farming. During my time there, I studied plants, made botanical drawings, and found myself engrossed in the wilderness for most of the day. As a final project, my friend and I created our own small business selling self-care products, homemade using organic ingredients from our local farms. We even used honey from our bees on our school's campus. At our symposium, we sold products and all of our proceeds went to the farm, Awbury Arboretum, from which we got all of our ingredients from.

It is important to encourage wildlife in our area and plant native species in our own backyards. By doing this, we are supporting our community's ecosystem and growth. Native plants are easier to grow than any other plant too! They are low maintenance, since they naturally adapt to our environment, have fewer pesticides, support wildlife, promote pollination, and even conserve water. Some native plants to our area are available on the following link: <https://buckscountyalive.com/gardening/nativeplants.cfm>. By encouraging native plants to flourish in our community, we can add a pop of color, along with eco-friendly benefits, all for inexpensive costs! I encourage our community to grow plants and foods in our own backyards, to support the growth of our community, while connecting back to our roots.

Borough Recreation Field Advisory Committee

Hulmeville Borough Council is beginning the process of determining the future of the field behind borough hall. For a number of years, it has been used almost exclusively by a soccer club. Now Council is interested in rehabilitating the field to be a multi-use, multi-purpose facility accessible to all residents.

To begin this process, we are looking for residents, civic groups, or other organizations interested in helping with the development of ideas for the field. If you would like to participate on an advisory committee, please contact Bill Wheeler (215-757-6531 or w.wheeler@hulmeville-pa.gov) and let him know of your interest. If you are interested in contributing ideas, but do not want to be on the advisory committee, we will be holding at least one, probably several, planning meetings. Watch our website (www.hulmeville-pa.gov) and the digital sign in front of the fire station for future meeting dates.

An initial meeting will be held on Thursday, May 4th, beginning at 7:30 p.m. at the Borough Hall. Whether you want to be on the advisory committee, just express your thoughts, or just come to listen, all are welcome.

For additional information on disposal options, contact:

Bucks County Planning Commission
www.buckscounty.gov/recycling

215-345-3400

or

The PADEP Recycling Hotline at
 1-800-346-4242

Why bring your household hazardous wastes to a scheduled event?

Household products containing toxic chemicals, like pesticides, oil-based paints, solvents, cleaning products, weed killers and automotive batteries can be a threat to people and the environment if improperly discarded. Never throw these materials into the trash, as the toxic chemicals may harm sanitation workers, or result in fires in collection vehicles. It is also not safe to pour them into a sink or storm drain as they can end up in the environment polluting the air, water, or soil.
